La nostra storia

Our story

Innovate and propose new ideas, always following the tradition and the origin of the family. For over 10 years Simone and Daniele Farinon have taken this path at the head of FMG Shapes, following the footsteps of their father Ivano Farinon and even before, of their grandfather Giovanni, an entrepreneur and marble worker since 1978.

Three generations united by the same values of tradition, innovation and culture brought towards to a constant search for beauty. IMERA is the sister soul of the company, created to express the identity of marble through Italian products and craftsmanship. The name is intended to be a reference to Magna Graecia and the use of marble for everyday objects, to a new beginning, a new day.

Innovare e proporre nuove idee, seguendo sempre la tradizione e l'origine della famiglia. Da oltre 10 anni Simone e Daniele Farinon hanno intrapreso questa strada alla guida di FMG Shapes, seguendo le orme del padre Ivano Farinon e prima ancora del nonno Giovanni, imprenditore e marmista dal 1978. Tre generazioni unite dagli stessi valori di tradizione, innovazione e cultura portate ad una costante ricerca del bello.

IMERA è l'anima sorella dell'azienda, creata per esprimere l'identità del marmo attraverso il prodotto e la competenza artigiana italiana. Il nome vuole essere una referencia alla Magna Grecia e all'utilizzo del marmo per oggetti quotidiani, ad un nuovo inizio, un nuovo giorno.

I Materiali

Materials

Aesthetics, refinement, uniqueness and expression are the fundamental characteristics which the careful selection of materials is based on. It is the expressive power of natural stones and marbles, combined with the skilful care of our craftsmen that defines the essence of each product.

Estetica, ricercatezza, unicità ed espressione, sono i caratteri fondamentali sulla quale si è basata l'attenta selezione dei materiali. E' infatti la forza espressiva della pietra naturale e dei marmi, accostata alla sapiente cura dei nostri artigiani a definire l'essenza di ogni prodotto.
