

CORSO

IL MATTONE DAL
LUNGO FORMATO
THE LONGFORMAT BRICK

S.ANSELMO
vivere la differenza

Non esiste materiale in edilizia in grado di assicurare prestazioni e qualità come la terracotta. Durabilità, ecocompatibilità, funzionalità tecnica, isolamento, salubrità, ma soprattutto estetica.

Nella modernità di stili e di materiali il genio di architetti e di produttori ha consentito a S.Anselmo di generare una nuova forma, finitura e colore nella terracotta con il prodotto "CORSO".

La dimensione allungata e sottile, i colori freddi e stonalizzati, la posa a giunti evidenti sono la modernità della terracotta, materiale irrinunciabile per l'edilizia.

There is no other material in the construction industry that is able to guarantee high performance and quality like clay.

Durability, sustainability, technical functionality, insulation, healthiness but above all beauty.

Combination of talents of architects, designers and manufacturers has allowed S.Anselmo to create the new long format clay brick "CORSO" which represents a great result of a new concept of shape, texture and color.

The thin and extended shape, the wide range of colors, variation of textures, and the size and position of the mortar joint cooperate to express the modernity of terracotta.

LO STILE PER L'ARCHITETTURA ORIZZONTALE

HORIZONTAL ARCHITECTURAL MASTERPIECE

LA MATERIA THE MATERIAL

Nella necessità estetica di colore e materia, il mattone "CORSO" utilizza l'anima della terracotta per trasmettere il valore del naturale e l'assicurazione del bello e durevole.

In the aesthetic necessity of color and material, "CORSO" brick uses the soul of the terracotta to transfer the real value of the character and the assurance of beauty and durability.

TEXTURES

TEXTURES

La storia, la tecnica, la materia, i colori, sono nella terracotta sperimentati da secoli trasmettendo da sempre bellezza e sicurezza. Ogni opera con il mattone "CORSO" sarà un'unica realizzazione di arte e di stile.

The history, the technique, the material and the colors have been experienced for centuries in the use of terracotta, always transmitting a concept of beauty and certainty. Each project with the "CORSO" brick will be a unique realization of art and style.

STANDARD

L'EFFETTO ESTETICO AESTHETIC EFFECT

Non si tratta solo di un rivestimento estetico, si costruisce un muro. È bello, forte, unico. È l'elemento materico che caratterizza l'opera e ne segna l'appartenenza di stile.

It is not just an aesthetical facing, but a full solid wall. It is beautiful, strong and unique. It is the fundamental element that characterizes the work and marks the choice of style.

LA GAMMA PRODOTTI/THE PRODUCT RANGE

The clay long format bricks "CORSO AQUA" are produced using a waterstruck technology, in other words the texture has a water effect. The color and the imperfections are obtained during the molding process.

Clay element produced using a soft mud technology that through a smooth texture proposes the wide selection of colors of our classic collections.

Our CORSO SELMO is an entirely handmade soft mud brick with a texture full of character with a rustic finish.

di produzione sono alle radici del mattone
un effetto dato dal trascinamento ma più liscio.

leaves the faces of the brick with a dragged but more
even effect.

The product "TERRA DRAGWIRE" has a special surface and texture created by a dragwire cut. The clay material is put into the foreground and the method of production leaves the faces of the brick with a dragged but more even effect.

leggermente sgranato ma non grezzo. but not rough, effect.

In the "TERRA ROLLED" version, the faces are finished with rubber rollers leaving a slight uneven, but not rough, effect.

* Any sizes and shapes available on demand / taylor made
